

EAU PLEINE KENNELS

Congratulations on the purchase of your new Eau Pleine Shorthair puppy. Eau Pleine Kennels has been breeding, raising and training German Shorthaired Pointers since 1974, striving to produce pointing gun dogs that hunt the uplands for grouse and woodcock, the fields for pheasant and quail and the marshes for waterfowl.

Eau Pleine Shortshairs are at home in the field, as well as in the home. We have bred for even temperaments, and you'll find that our dogs will easily become a member of your family.

All puppies have been socialized, wormed and have received their first shot. Tails were docked and dewclaws removed at three days of age. We recommend that you take your new pup to your veterinarian by 9 to 10 weeks of age and be put on a regular schedule of shots and worming.

HEALTH GUARANTEE

Eau Pleine Kennels guarantees that all puppies transferred to their new owners are free from physical defects. This includes, but is not limited to eyes and hips. As breeders we require new owners to notify us of any defects, as that information is critical to our breeding program. All we request is a veterinarian's verification in writing. Eau Pleine Kennels will provide a replacement puppy as early as possible.
